```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.2 2011/11/02 04:08:53
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

2. 6-meter 1kW amplifier modules

Newsgroup: rec.radio.amateur.equipment
Date: 2012-01-02 01:19:01 UTC
From: Warren <warrens@ns.DOT.sympatico.DOT.ca>
Message-ID: <jdr0lj$b25$2@news.datemas.de>
Source record: 408

I have several 1kW television transmitter modules that will work fine on
6 meters.

A full write up and pictures are available here.
http://www.gemoto.com/LarcanPA.htm

These are the "low-split" modules that do not require any further
modification.

With some work, these amplifiers will produce well over 1kW on 2 meters.
Check this writeup by Brian Justin, WA1ZMS
http://members.rennlist.org/warren/larcan_2m.pdf

RF input and DC input connectors are included but other parts are needed
to get operational. DC power supply 50V @ 50A, RF coaxial relays,
cooling fans, etc. Some assembly required. :)

Price as per the web page above, $370 plus packing and shipping from
Nova Scotia, Canada. Total cost approx $455 - $470. Proceeds of the
sale go towards my ham club.

Contact info on my original ad on QRZ.
http://forums.qrz.com/showthread.php?324147-6M-solid-state-1kW-amplifiers

Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

Tri-band mobile with 2 bands installed: 2M and 70 cm. Module can be added to open slot for 10M, 6M, 1.25M or 23cm (I have seen quite a few of these band modules on eBay). FM only! Everything works on this radio. 2M PA module is newly replaced and about 15 minutes of use on it! 70cm PA is original, but has very limited use on it. Comes with DTMF mic, power cord and mobile mounting bracket. I can send manual, service manual and schematics on CD if desired. Pic available on request. Please email me direct at acepilot at bloomer dot net. Asking $350 plus $25 for shipping/insurance to USA. Excess shipping will be returned.

Scott

15. Anyone seen one of these GIANT vacuum tubes?

Newsgroup: rec.radio.amateur.equipment
Date: 2012-01-16 22:24:38 UTC
From: Sprocketart <Sprocketart.95a6479@radiobanter.com>
Message-ID: <Sprocketart.95a6479@radiobanter.com>
Source record: 434

The attachments are of a vintage vacuum tube in its original shipping container. There is no date on the container. I left it this way in its original condition to protect the tube and history as well. The tube says "Federal Tel and Radio F 212E Made in USA". I have no way of testing this but knowing the source I am sure its good. This guy was very meticulous and I practically have original receipts with almost everything. I bought a big lot and will be selling a large amount of vintage tubes on EBAY. I can find info and values on almost all of them except for this one. I want to sell this one as well. If anyone can help me please it would be most appreciated. With what I have learned lately this tube is probably rare. This is my job now and thus my only source of income so please help. OK THE PICS ARE TOO BIG. Feel free to email me with inquiries.

I ran across the YOUTUBE entry which shows the effects of connecting the above on signal amplification and have been searching to get one for some time. I use a Grundig Satellit 800 connected to a 60" long wire with a WR LWA-130 adapter between the wire and the receiver.

The performance of the UNICOM Shortwave Antenna Amplifier really impresses me and I would like to get one. Does anyone know where I can find one.

forums.qrz.com/showthread.php?...HEATHKIT-SA-5010-uMATIC-KEYER

My suggestion would be to purchase a new one - there has been a lot of technological advances since that design was last made some 35 years ago.

Maybe you can do a internet search - I heard that Heathkit was getting back into the ham radio business. Maybe you can find a reproduction.

25. Crossposting Permitted to rec.radio.amateur.moderated

Newsgroup: rec.radio.amateur.equipment
Date: 2012-02-01 07:00:03 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/moderated/crossposting-1-1328079601@panix.com>
Source record: 302
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.2 2011/11/02 04:08:53
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

I have one and several others in the local club have them. They work very
well , especially for around $ 100 to $ 120.

You do need the programming cable with them. They can be programmed without
it, but it is so much easier to use the computer. If you get the cable,
make sure you push itf something like it is not communicating. If you do
, check the com port and make sure it is really pluged in all the way.

There is a free program from them that will program it, but a beter one for
free is called KG-UV Commander.

36. The NEW R.L. Drake Virtual Museum

Newsgroup: rec.radio.amateur.equipment

Source record: 313

Fellow Drake Enthusiasts,
The NEW R.L. Drake Virtual Museum is here http://www.drakemuseum.com . It's being launched page by page. You may follow my work at the new webiste.

The R.L. Drake Virtual Museum is under construction so there's not much there yet, but "stay tuned" ! Please observe that links in the menu is activated when the pages are ready to be presented.

The former R.L. Drake Virtual Museum http://www.dproducts.be/drake_museum/ has been closed.

Thanks to all the 450.000 vistors!

The main reason for closing it, is that my friend who I had the website together with, passed away last Christmas.

I have decided to build up a NEW Drake Virtual Museum from scratch. It will contain a lot of new pictures and info in addition to what were found in the former museum.

Welcome to The (NEW) R.L. Drake Virtual Museum www.drakemuseum.com

Sindre, LA6OP sindtorp@online.no

Looking for input on repeater receivers, what works, what doesn't, what is available. Currently am using a Hamtronic R302 (second replacement), need something more reliable, with external squelch control, and volume control (for external speaker monitor)/ with monitor amp.

Many people use Motorola receivers.

Some use the older repeaters such as the MCS-2000 or MSF-5000, and many use the Maxtrac and similar radios.

There are many two channel VHF 25kHz radios floating around, most too good for the dumpster but not good enough to use. Once they become illegal for commerical operation (Jan 2013), they will end up in the dumpster.

The Maxtracs and MSF-5000's need to be programmed, but that's not too difficult to find someone to do it for you if you can not do it yourself.

Many of them have discriminator output which is pre squelch, pre shaping and filtering and pre volume control. On the front panel is a speaker and volume control, but you can fit an external speaker if needed.

Repeater builder.com has plenty of articles on them.

Geoff.

They are very popular, especially based on price. However, they normally do NOT meet specs, though they are sold with the claim that they do. Often the 2nd harmonic of 2 meters is 10 db or more above spec. QST found this in a test of one of the many versions.

An organization I know was planning on having some custom units made up. After several weeks of going back and forth with the manufacturer and not being able to get a straight answer, they gave up. At least one picture from their spectrum analyzer was clearly doctored.

That wasn't the Woxoun, that was the Baofeng which is a very different radio made by a very different company.

Even then it was taken out of context.

The Baofeng UV-3R is wide band radio (76-512 mHz) with firmware and filtering to limit it to reception on the FM broadcast band and reception and transmission from 136-174 and 400-470 mHz. You can stretch the bands with software, but the results are not always worth it.

The original radio was shipped as a two band radio with VHF and UHF antennas.

Without an antenna there is a spur at 2x the 2m band, 300mHz. With a 2m resonant antenna such as the one supplied with the radio or the UHF one, there is no resonance at 300mHz, and the spur is suppressed.

The problem was noticable if you used a wide band antenna, such as a discone.

The later production units had additional filtering added to prevent this. That model is no longer made having been replaced with the UV-3R Mark II and the UV-3R+ (plus) both of which have the filtering.

In either case, buying a Woxoun or a Baofeng, you don't have to worry.

Geoff.

the other freq issue that caught my eye was the PL tones -
since most repeaters around our urban area are all PL encoded,
the xmit tones have to be dead on - in both winter cold & summer hot
weather -

OK, I'm a bit confused. At the top, you say it meets or beats FCC
technical standards then and at the bottom, you say hams would be
lowering their standards buying this "piece of crap". So why is it
junk? Because it wears down a battery in use? So would a mobile or
base radio running on a car battery...

I think he was complaining because the early radios (before Part 90 certification) were not quite compliant on 2m in terms of spurious radiation. In practice they were ok if you used a resonant antenna.

Once they were "cleaned up" for part 90 certification, they were fine.

This is pretty common with Chinese radios, the CW QRP rig sold by both MFJ and Ten-Tec were the same way. The original radios sold from China as a kit and later from Canada via eBay also lacked proper filtering.

The radios were three band, the Ten-Tec version is two band, the MFJ version is single band. Both have improved filtering and are legal in the US.

Note that several of the Japanese companies are using factories in China, so the difference between a name brand an unknown brand may be very little.

Bottom line, if you bought them from eBay vendors a year ago, you may have problems, if you buy them today it should be ok.

That amp is a PIECE OF CB SHIT.

It's junk.

It was junk when it was "designed," it was junk when it was on the
air, and it's junk now.

Tell you what, you send $100 to my PayPal account and I'll take it off
your hands. When it arrives at my place, I'll put a couple of
12-gauge blasts through it to keep that POS off the air.

In fact, it's probably illegal for you to be offering it for sale.

I note there's no bandswitch on it, meaning, it operates on only one
band -- 11 Meters -- where linears are illegal.

Here's a forum where someone has posted close-up photos of this piece
of shit -- look at the construction -- look at the PC boards -- JUNK
-- and it looks as though it was soldered by a troop of monkeys.
http://www.worldwidedx.com/general-cb-services-discussion/25842-eagle-525-base-linear-not-
golden-browning-2.html

Look closely at this photo -- note the variable capacitors -- the
variable capacitors used to tune the output stage are clse-spaced
RECEIVING VARIABLES -- and these are supposed to be running several
hundred watts??

R6000 Multiband Vertical
The R6000 is a 6 through 20 meter, no ground radial antenna. It includes many of the features of the
R8, R7 and R5 antennas. R6000 means excellent performance, easy installation and use, slim silhouette and high reliability. There are no traps used on 6, 10 and 15 meters for maximum efficiency and power handling. The R6000 employs quarter wavelength stubs on 10 and 15 meters to
replace standard trap coils. The result is lower loss and wider bandwidth. The R6000 covers all
bands 6 through 15 meters at a VSWR under 2:1. On 20 meters you can select the top 300 KHz or bottom
300 KHz of the band. The R6000 weighs only 12-1/2 pounds (5.6 kg). It is lightweight and easy to
mount for portable or permanent installations. Machined aluminum clamps and UV stable insulators
guarantee years of reliable service. The R6000 comes with the standard Cushcraft warranty of one
year from purchase - plus the industry's leading technical support team stands behind each Cushcraft
antenna. The R6000 makes an excellent diversity antenna to complement even the most complete
stations, or pack up the R6000 for a trip to the DX location of your dreams.

Plus you need a tower and rotator for another pile of money.

Sometimes you have to put up what you can such as a ham I talked to the
other day that was on a lot that was about 40 feet by 100 feet.

Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.

Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

66. Yaesu Expert Needed: Mars Modification for Yaesu FT-857D - US version w/just 2 jumpers

Newsgroup: rec.radio.amateur.equipment
Date: 2012-03-07 17:51:38 UTC
From: Jim <nospam@nospam.com>
Message-ID: <b77fl79aojvvrtv89uqvcot17ukb68nea6@4ax.com>
Source record: 343

I went to the various MOD sites and almost all of the sites say
that you should remove from the row of 9 SMD jumpers on the main boad:

1001
1002

Leave jumper 1006 in place

Place jumpers on:

1007
1008
1009

leave blank:
1001
1002
1003
1004
1005

OK here is the strange part.

My FT-857D has no jumper 1006, only jumpers 1001 and 1002.

In my searches across the web for information, one fellow said that he
removed jumpers 1001 and 1002, and the radio locked up, and he had to
send it back to Yaesu for expensive repairs. He said they told him
that the later radios were changed so they could not be modded, which
sounds like baloney to me, how would MARS operators use them?

My reason for wanting the mod is that the 60 M frequencies are
pre-programmed in the USA versions, and as you probably know the
frequencies have changed. I wrote to Yaesu to ask them if they would
be coming out with a way to update the 60 meter changes, and they said
no plans to make this available. So much for Yaesu support. This
really got my goat as several of my old timer buddies will be working
on the new QRG's and I have no way to use the Yaesu rig to make
contact.

OK, after a long winded explain, here is the question. Has anyone out
there done a successful MARS mod on the FT-857D with just the two
jumpers, and if so, can you steer me in the right direction, as I
don't want to end up having to face an expensive repair. I have
searched probably over 100 sites, most go back to the same sites, and
yet to have found any instructions for the version of the radio here.

Thanks for any help on making the changes. I tried to just go to those frequences and when you hit the MIC key you get TRANSMIT ERROR on the display.... Bummer....

73,

Jim

I am very new to this hobby. I would really like to listen to 9870 KHz All India Radio. I have a Kaito WRX-911 which I bought from Amazon and it doesn't really receive the signal. I was only able to hear the station for 5 second once and it was very very weak. I live in Los Angeles, CA.

Can you please suggest a radio which will work best for my purpose.

Thanks,
vir

Greetings.

I'm getting rid of non-functional or partly-functional "project" stuff,
including two R-390A receivers, a RACAL 6217E, a DEBEG 2000, and an
ITT-MACKAY 3020.

Prices and image URLs are below. Packing and shipping from 73069 (Norman,
Oklahoma, USA) is additional.

DEBEG 2000 $100 <http://hamstuff.ath.cx/?q=node/51>
ITT-MACKAY 3020 $100 <http://hamstuff.ath.cx/?q=node/52>
R-390A EAC S/N 194 $200 <http://hamstuff.ath.cx/?q=node/53>
R-390A AMELCO S/N 686 $200 <http://hamstuff.ath.cx/?q=node/54>
RACAL 6217E $100 <http://hamstuff.ath.cx/?q=node/55>

More photos available on request.

75. 1kW - 6 meter / 2 meter amplifier modules for sale

Newsgroup: rec.radio.amateur.equipment
Date: 2012-03-18 14:47:30 UTC
From: Warren <warrens@ns.DOT.sympatico.DOT.ca>
Message-ID: <jk4shi$3ro$2@news.datemas.de>
Source record: 252

I have several 1kW Larcan television transmitter modules available.
These are "low-split" modules and do not require modification for
6-meters. They will also cover the 70MHz / 4-meter band with no changes.

A full write up and pictures are available at
http://www.gemoto.com/LarcanPA.htm
(Note: This is NOT my web page and is supplied for information purposes
only)

With some work, these amplifiers will produce well over 1kW on 2 meters.

RF input and DC input connectors are included. Other parts such as DC
power supply 50V @ 50A, RF coaxial relays, cooling fans, etc are needed
to get operational. Some assembly required.

Packaged weight is about 20kg / 44 pounds. The amplifier module itself
weighs about 14kg / 31 pounds.

Price is $370 plus packing and shipping from Nova Scotia, Canada. Total
cost approx $455 - $485 throughout the USA. Proceeds of the sale go
towards my local club. PayPal preferred.

Further information, pictures, etc available on my web page.
http://members.rennlist.org/warren/6meteramp.html

The frequency stability of my HP3312A function generator is poor, very annoying for many practical use. I am trying to determine whether that behavior is fairly normal for function generators, or my particular unit has got a problem.

What is your experience on function generators frequency stability?

Thanks & 73

Tony I0JX
Rome, Italy

Any of the VCO-based function generators, such as the 3312A, are going to be wobbly in terms of not only stability but ability to generate a specific frequency or range of frequencies.

You need to move to a synthesized source to get better results. One candidate would be the HP 3314A, which is a synthesized generator, and covers up to 20 MHz.

I have one of these; it's very flexible, and stable. It doesn't have the ability to lock to an external standard, but it is crystal controlled.

With a synthesized device, you have digital control over frequency, sweep parameters, and with something like the 3314A, you also have digital control over amplitude and offset.

eBay offers some inexpensive function generator boards as well.

79. Crossposting Permitted to rec.radio.amateur.moderated

Newsgroup: rec.radio.amateur.equipment
Date: 2012-04-01 06:00:02 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/moderated/crossposting-1-1333260001@panix.com>
Source record: 256
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.2 2011/11/02 04:08:53
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

80. Seeking New FAQ/Intro Maintainers for rec.radio.amateur.*

Newsgroup: rec.radio.amateur.equipment
Date: 2012-04-07 06:05:00 UTC

Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

82. HF radios

Newsgroup: rec.radio.amateur.equipment
Date: 2012-04-10 02:16:42 UTC
From: Native Terran <finnigann2580@gmail.com>
Message-ID: <hh57o7lp5iblkqu9emdfilep4l26ufgmlq@4ax.com>
Source record: 259

I'm getting a substantial refund check this year. I need advice regarding some new hard ware.

I'm looking at the FT-950 from Yaesu or Kenwood TS-590 and Icom IC-7200.

I have a FT897 currently and have some familiarity with their way of doing things. I'm not totally
in love with all of their design choices however.

But other than that, I'm open minded.

Suggestions?

All three have been reviewed in QST. I suggest you read and review the
articles and technical measurements from these units. Much could also
depend on your intended usage. Portable vs. mobile vs. home station;
ssb vs. cw; what is your total budget; etc. Good luck on your
research. For a similar total monetary outlay, there might be more
capable rig availaable.

Yes, but I was looking for personal recommendations. I _have_ read the reviews. But these
are
written by experienced operators and are hardly ever critical.

But let me add that the radio is for base operations. I have a capable radio (FT 897) for
mobile
use. I like it allot. However I'm open to other opinions..

Perhaps someone has used two from my list and can offer a comparison of those two radios.
I'm not an
experienced user but this isn't my first day either. Say top of the newbee level or the
bottom of
the intermediate level. Plenty of things to learn.

Not an unlimited budget, around $2000. I'm 60 and I am thinking about a radio that will last me the
rest of my days.

What can't you understand?

Call Bob at Ham Radio Outlet in Delaware.
Unless you have $3300 + for a Ten Tec - the only other transceiver you can afford that does it all well is the Kenwood TS 590S....

Most hams wouldn't waste their money on two relatively new rigs at the same time unless they had a unlimited budget or had a problem with the one or the other. And I am not aware of any supplier that would just take the one back - USED and replace it with another new transceiver of a different manufacturer.

Your best bet is to drive to a ham radio store and look at them before you buy them.
My experience came from buying a transceiver sight unseen - by reputation and a recommendation only.

If the TS 590S has only been released here in the USA for one year, there is not going to be a lot written about it other then a glowing report written by the ARRL Labs that was posted in QST Magazine last year....

No one can hold your hand and no one can tell you what to buy.
Regardless of what they tell you - if you look hard enough, with a electron microscope - you will eventually find something wrong with all of them.
The Kenwood is just too new to have problems yet.
There isn't even any updates available for the one I bought last September.

Dealers may be bias towards a more profitable model. Not all of 'em perhaps.

>

I was unaware of the short time the Kenwood (590) had been in the market. However soliciting
opinions on various models of radios isn't a waste of time. Maybe I should have listed the Kenwood
2000 as an option.

>And I am not aware of any supplier that would just

Prolly pretty uncommon. That's why I didn't think of it.

>

An expensive school...

>
>No one can hold your hand and no one can tell you what to buy.

I was only asking for opinions. My hand-holding days are far behind me. I'm prepared to live by
whatever choice I make. But if I can avoid an obvious land mine, why not.

>Regardless of what they tell you - if you look hard enough, with a
>electron microscope - you will eventually find something wrong with all
>of them.

I'm not looking for the perfect radio (for me) I don't know enough about ham radio to do that sort
of checking - to find every defect.

So, after reading your message (several times) I can't find your ideas on my request for info. Did I
miss them/it?

The reason I recommended BOB @ Ham Radio Outlet is because I have dealt with BOB personally and he has never screwed me.
I'm not completely sure about his bio - but I believe that he has been a ham 40 - 50 years, the same as many of my friends who recommended the TS 590 to me.

On the other hand - you asked about the Kenwood TS 2000 - and I do have experience with the TS 2000.
The TS 2000 is a very old design - I have QST magazines here from 1999 that has that model advertised, it is a very old design.
I would put it in the same class as the ICOM 746 Pro - a lot to go wrong in a little box. http://www.eham.net/reviews/detail/1249

Nobody is going to buy one if they hear that it sucks and is not a very good transceiver.
Most people that does buy one does not have anything else of comparative value to compare it to.
Like making chicken soup out of chicken poop.
Kenwood does a very good job of hiding the fact that the TS 2000 is a compromise between a good HF transceiver and a fairly good VHF / UHF transceiver.
Only, when you combine the two - you have to give up something to get something.
Like buying a 1985 Z/28 - IROC Z/28 Camaro and finding out that the factory stock tires are no good in the rain and the car doesn't go anywhere in the snow. On dry / hot pavement - it is a good performer - period...

Another factor in the 2000 that I do not like is the fact that when it breaks you are not only out a HF radio, but also your primary VHF and UHF radio....

Its much easier to purchase the 590 and a inexpensive mobile such as the Yaesu 8800 or 8900 and have multiband coverage and the opportunity to cross repeat in a emergency then to have a single band VHF transceiver which might be cheaper - but doesn't do anything else such as APRS or UHF or cross repeat.....

If money is an issue, you could purchase the Kenwood TS 480 SAT and still have the autotuner feature and the capability of working mobile. Although the 590 also makes a pretty good mobile itself...

Like the robot on Lost in Space , I will tell you - warning, warning, danger, danger -- do not buy the ICOM Will Robinson...
Let them make a bunch of them and then let someone else see if they are any good before you plunk down your hard earned cabbage on one...

The FT 950 is another outdated transceiver with it's own set of issues. The one my friend had, which I used a couple of times was a piece of junk.
When he died, it was arcing inside of the microphone - with no amplifier connected and sitting side by side - comparing it against the Icom 746 pro with 100 watts on the same antenna 10 miles apart.
The guys with the Icoms were checking into the nets on 160 meters and the guy with the Yaesu wasn't being heard....
And the guys with the Icom's were down in the valley and the guy with the Yaesu was on top of a large hill - where he could talk 2 meters for 70 miles the way you would talk with your walkie talkie to the local repeaters...

Like I said before, I had several opportunities to buy it, even for $700.00 and did not and it was only 9 months old when they sold it.

...then there's the ad in the QST I received today for a new Kenwood transceiver to be announced @ Dayton next month. I had several Kenwood xceivers - a 520 then an 820 and an 870 - and was happy with all of them. But Kenwood seems to have skipped the dance recently - twice at least! It'll be interesting to see what they roll out. Being potentially a newer design than the competition... who knows?

You can get into a TenTec for that much money. Since you have time to check it out, there are some good deals out there but be very careful in the used market. Most of us feel there is no ethical way to sell a lightning struck transceiver, regardless of brand.

Having said that Ham Radio Outlet has a very good reputation here in the Piedmont area of North Carolina.

TenTec takes a personal interest in every customer. They (and everyone else) can be checked out pretty well on YouTube.

I have had my TenTec Jupiter since the were first available and I am willing to upgrade when something better comes along. That just has not happened.

I am 72 this month and I hope that I am young enough to need another radio in the future.

However, if Yaesu does not come up with the Free Mod to make my FT-857 comply with the 60 meter changes, I am looking at my last Yaesu product. Since this is to be a long term radio, consider issues such as that!

On the other hand, Ten-Tec has a 30-day return policy for new gear (they
only sell direct).

Source record: 268

Select-A-Tenna is a LARGE Passive Loop and can produce 30DB signal gain
when used with an AM radio receiver.
Requires NO Wires or Batteries. It works simply by placing it next to
your radio and tuning the Variable Capacitor
to the same station frequency as your radio!

MINT CONDITION

Here's a Picture
http://dl.dropbox.com/u/38264135/select%20a%20Tenna.gif

Here's a Video:
http://www.youtube.com/watch?v=HAXPfnuCwTg

This model has a 3.5mm Mini Jack allowing connection DIRECTLY to a Radio
with NO Internal AM Antenna.
So, for example, it would make a GREAT FT-817 (or similar rig) accessory
to enable Late Night AM DXing
or AM Listening in addition to your QRP Activities.

$49. INCLUDING Priority Shipping to CONUS address w/Delivery
Confirmation
INSTANT PAYPAL REQUIRED

PROFESSIONALLY WIRED AND TESTED

Now you can give your home Part 15 Stereo Transmitter the features found
in a professional radio station! Control and prevent overmodulation and
“sweeten” the mix with Bass, Presence, and Brilliance. This
allows you to compensate for a lack of bass, treble or midrange. Custom
tailor your sound to your own taste. Perfect companion for the Ramsey
FM10A and the FM25 or any other FM (or AM) radio transmitter.

Requires 12VDC. Uses line levels from CD players, tape decks, mixers
etc. Bass, Presence, and Brilliance controls. Dynamic Range Limiter to
prevent overmodulation and 15kHz 8th order Butterworth Low Pass Filters
to prevent high frequency interference with the FM Stereo carrier.

Ramsey List Price for factory assembled STC-1 is $120.

Excellent Condition
w/pdf Manual, requires 12VDC Regulated Power Supply
$69. Including Shipping to CONUS w/Delivery Confirmation
INSTANT PAYPAL REQUIRED

Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

101. Crossposting Permitted to rec.radio.amateur.moderated

Newsgroup: rec.radio.amateur.equipment
Date: 2012-06-01 06:00:03 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/moderated/crossposting-1-1338530401@panix.com>
Source record: 278
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.2 2011/11/02 04:08:53
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

I concur. I use an HP 3325A. It's pretty solid, a synthesized unit,
and it can be used with an external reference. They're old enough to be
cheap on the used market, yet new enough to be as featureful as we
expect these days.

That said, the OP's 3312A shouldn't be THAT bad. Is it possible the
main oscillator's performance is being spoiled by aging components, like
dried-out electrolytic capacitors and such?

The PRC restricts the import of radio transmitting equipment, other than the temporary import of mobile phones. You need to ask this question of your Chinese embassy. You would need an import licence and my guess is that you will not get one.

I don't know if there are any (transmitting) licence exempt allocations, or whether they are available to non-citizens.

AFAIK their version of 446PMR is 409MHz SRPR, 20 public channels
within 409.750-409.9875 (12.5kHz, 500mW)

Same as in HK

Probably the easiest way of getting radios for use in Tibet is to source
them locally, and get them shipped to a convenient collection point.
China and Hong Kong are certainly not short of manufacturers!

Even for an American in the UK, that would be the best approach, as radios not specifically approved for PMR 446 are not covered by the class licence.

For China, it will be part a question of protecting their own industry and partly a national security issue. Given its history, national security is likely to be a particularly important issue in Tibet.

I note that the OP's intended radio (Motorola Spirit UHF) is 1 channel.
2W. The Chinese public service radios are only 0.5W (and with a tiddly
antenna), so even if these are readily available, they might not be
quite suitable.

>For China, it will be part a question of protecting their own industry
>and partly a national security issue.

Importing two-way radios into China would probably not be threatening
their own industry. They probably originated there in the first place!

> Given its history, national security is likely to be a particularly
>important issue in Tibet.

It says in
http://tel_archives.ofca.gov.hk/en/ad-comm/tsac/ns-paper/nsp2002p3.pdf

"In December 2001, the Ministry of Information Industry of China
announced that short-range portable radio transceivers, or
"walkie-talkies",
operating in the band 409.7500 – 409.9875 MHz with transmitter power not
exceeding 0.5W were exempted from licensing."

Presumably these are legal to use throughout all of China - but you
never know. In certain countries, being legal does not guarantee you
won't have problems. Only a couple of weeks ago, a German radio amateur,
operating absolutely 100% legally when on holiday in Greece, was
arrested and hauled before the courts. I believe he is back home, but
may need to return for a full trial.

Unless Ofcom has failed to update their information, it also has to have things like a permanently attached antenna, absolute power limits, etc., basically to make it non-trivial to modify outside of the specification. As pointed out elsewhere, the proposed equipment doesn't comply with those conditions, so wouldn't have been legal for PMR 446 use.

I used approved loosely, to mean designed to meet the conditions of the licence exemption.

Where in the current interface requirement does it say anything about a
permanently attached antenna?

That seems to be a fairly brief summary. More detail is in the older RA
document:
http://www.ofcom.org.uk/static/archive/ra/publication/ra_info/ra357.htm

"5. RADIO EQUIPMENT
PMR 446 radio equipment must be handportable, have an integral antenna,
have a maximum ERP of 500 mW and be compliant with ETS 300 296."

I doubt if they have changed the technical specs.

But change the specs. is exactly what they have done.
ra357 is only there as an archive and is no longer the applicable
document. The current interface document is IR2009.

Which is the document that I have continually referered to on here
many time, but no one listens ;-)

Specifically -

Converted radio equipment

If modifications are made to the equipment, such as adding an antenna
connector, the overall maximum ERP or other technical parameters must
not exceed the permitted levels set out in the Interface Requirement.

Problem solved.

If he was in the rightr then he was in the right.

Holiday insurance should cover that and I'd be seeking legal redress
from the Greeks if there are any avenues to pursue.

As I've always preached - take no s***t from anyone especially
when you have right on your side.

I've only glanced through it, but I get the distinct impression that
there is a tacit acceptance that the original 'only built-in aerial'
rule is being broken.

It's good advice for him to remember when he is serving his 5 month jail sentence for refusing to turn over his log files, because he refused to give them a laptop which had nothing to do with his radio operation.

Geoff.

Why don't you query the various Chinese manufacturers that make HTs?

Tell them if it is possible to purchase these HTs in China and use them
in China

Yes maybe you cannot import anything but buying them may be something
too

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.2 2011/11/02 04:08:53
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

If you can not get streaming audio from the web
http://allindiaradio.gov.in/

I would suggest that you install a good outdoor antenna to try to
improve reception or purchase an amplified antenna.. I think that
that radio has an external antenna jack.

Check out a store like Universal Radio on the internet.

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

140. TM-742 on 70 MHz

Newsgroup: rec.radio.amateur.equipment
Date: 2012-07-30 03:27:00 UTC
From: Fred McKenzie <fmmck@aol.com>
Message-ID: <fmmck-FD0AD1.23265929072012@5ad64b5e.bb.sky.com>
Source record: 67

I am interested in the 70 MHz band that is currently authorized in some European countries. I understand the frequency is no longer used by the U.S. television system, so it could be authorized here in the future as well.

According to an article on how to modify the Kenwood TM-742, the 50 MHz module can tune to about 90 MHz. Is anyone actually using one on the 70 MHz band? Is it necessary to realign the module, or does it work as-is?

Not quite true. There is a full-power DTV station in Illinois (WHBF -
FCC Facility ID #13950) and a Class-A digital (also in Illinois) WOCK-CD
(Fac ID #35092).

There are also a handful of LP stations around the country on VHF
Channel 4 - some in analog (who will be facing the 2015 LP shutdown) and
some as LP digital.

One doesn't mean the other. One reason the 11metre band disappeared to CB was because it wasn't an international allocation. Same with 220Mhz, even 144MHz, only some of it's an international allocation.

Yes, some work has been done to internationalize things, but that tends to be to give some specific change, like in the low frequency allocations. That gives a whole different propagation situation.

So just because there's a 70MHz allocation somewhere doesn't mean it will come to North America. And for that matter, just because a frequency range may become available doens't mean it will go to amateur radio.

Note that history shows we've lost more vhf/uhf allocations over time than HF allocations, indeed, we've gained some in HF.

Michael-

I don't know all the legalities, but NK1G's comments are probably the
main reason it will not happen any time soon. I was not aware that
there were still Television stations using the frequency.

In the meantime, I would like to listen to see if I can hear the
Europeans during band openings. I could construct a converter, but it
would be easier if the TM-742's 50 MHz module worked there. I guess
I'll have to try it to find out.

It just occurred to me that not all 70 MHz activity would be on FM, as
is the case on the 50 MHz band. Perhaps a converter isn't such a bad
idea!

Hi Fred

There are increasing numbers of countries in Europe and the Middle east
getting allocations on 4M, its worth looking at www.70Mhz.org for some
up to date info.
However you are unlikely to hear trans Atlantic traffic on FM, you would
be a lot better off building a converter. There have been a few cross
band QSO's between the US and EU using 50 / 70MHz. You have probably
missed the season now though. Have a look for CT1FFU on you tube..

Good Luck

Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

So why would you expect someone to still be here after fourteen years?

Since people have always believed this was a buy and sell newsgroup, it isn't, there's massive turnover since most posts are hit and run. But even among regulars, there can't be many of us from back then who still check this newsgroup. And those are likely to be the ones who actually participate(d) in discussion here, not the advertisers.

And why does it matter? Even if the guy is still reading the newsgroup, why would you care whether he sold it or not? If he didn't, it was likely tossed long ago.

All you idots replying to old messages, why don't you just find the original poster and email them if you really so badly have to ask about an old message?

JUNK

It is ok if you work Public Service and have a use for it.

But it is no good for anything else.....

AND - if it requires propetiary software to operate and program - it
will cost you more in the long run to buy it then to buy new....

That's odd, there was that guy who bought the rights to the old manuals from Heathkit and then clamped down on free copies. He will sell you the manual, though.

Posting-Frequency: posted twice monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.

From: 1001WordsPhoto <1001WordsPhoto.a996f78@radiobanter.com>
Message-ID: <1001WordsPhoto.a996f78@radiobanter.com>
Source record: 1

I have the Sony SW7600 shortwave receiver and an external antenna that I would like to connect. However, when I connect the antenna to the jack, the radio cuts out and very little sound is played. I can have a station on the internal and telescoping antenna, and when I plug in the external antenna, I lose the station. I have double checked the external antenna connector, and the wiring is good. The antenna is a random length dipole. Even local stations drop out. I opened the case, and tried to test the antenna jack. I am using a stereo male jack. When I connect the external antenna and use a continuity tester, the ground and second contacts have continuity to the circuit board, but the tip does not. Should the tip have continuity, and to what? I have the online repair manual, with circuit diagram and board diagram, but I am a novice at electronics. Thanks for the help in advance.

WTB: Remote Antenna Selector Relay Box
WANTED:
I'm looking for a high quality, high power (1.5KW+), 12 VDC or 24 VDC,
remote antenna relay selector box for use with an Alpha DAS.

Indoor or outdoor is okay, but latter preferred.

Because of its superior specifications the DX Engineering RR8B-HP is
the unit of choice.

However, these may also be suitable:

Comtec RACS-8 (preferred)
ToptTen Sixway
Array Solutions RATpak

PayPal payment preferred.
Shipment to Zip Code 93111.
Please quote full price, including shipping, item condition, and
provide photographs via e-mail: Larry (at) KJ6YVT (dot) COM

PS: I'm also looking for a RS-232 or USB computer controlled antenna
rotor.

Web Site: http://KJ6YVT.com

as i understand it, the adhesive between the ribbon cable and the lcd itself and the cable and the pcb is contaminated and needs to be removed and replaced with a conductive adhesive as used in the ribbon cable repair in ipod touches

I will be trying this method soon, lining back up the cable i think will be the bigest task aside from removing the cable without damage.

And the post you replied to is from May 21, 2009.

WHoever posted is long gone by now. Don't reply to old messages, even if
google buggishly allows it. They need to fix that.

If you want to discuss an issue, start a new thread, rather than resurrect
an old one. Nobody knows what you are talking about (you didn't even
quote the message you are replying to), and the only reason I know what's
going on is because people replying to old posts via google is now an
ongoing problem.

Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.2 2011/11/02 04:08:53
Posting-Frequency: posted twice monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

OC-

I've had that problem with Icom IC-706 and IC-7000 radios. The problem is that they are not able to operate with less than some critical voltage.

To start, you need to have the car's engine running to be sure battery voltage is 13.8 Volts. I assume you have a good connection to the battery and sufficiently heavy cables connecting the radio. If it is the same setup as you had before, it should still work.

That leaves the fuse connectors and the radio connector as possible sources of resistance. You can try using pliers to tighten the fuse clips by bending them slightly. If the radio power connector has been reconnected numerous times, its sockets may have become spread. You may be able to use a jeweler's screwdriver or a small blade on a pocket knife, to bend the socket sides inward. In either case, be careful not to overdo the bending.

In my installation, the problem first arose when I went to using Anderson Powerpole connectors with a Rig-Runner multiple outlet box to feed an additional rig. Each Powerpole connection introduced slightly more voltage drop, compared to wiring the radio directly to the battery.

In order to keep the Powerpole connectors in line, I purchased an MFJ-4416 "Super Battery Booster". It is a DC-to-DC switching power supply that takes a variable input voltage as low as 9 Volts, and produces a constant 13.8 VDC output at 25 Amps peak. (When it is turned off, the battery voltage is fed through to the output.)

If low voltage is your problem, using the MFJ-4416 would probably solve it. It also would solve a problem you may not be aware of. Output power of solid state transmitters is extremely sensitive to battery voltage. With a constant 13.8 volts, you always have full power.

Fred-

Thanks a lot! The problem did turn out to be the fuse contacts. I made
them a little tighter and problem solved!

Thanks

OC-

I'm glad to hear the problem is solved.

After I posted, it occurred to me that you might also have a blown fuse
in the minus battery lead. The radio might still have power through the
antenna ground connection, but circuit resistance would be higher.

203. Crossposting Permitted to rec.radio.amateur.moderated

Newsgroup: rec.radio.amateur.equipment
Date: 2012-10-15 06:00:03 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/moderated/crossposting-1-1350280801@panix.com>
Source record: 30
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.2 2011/11/02 04:08:53
Posting-Frequency: posted twice monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

204. GRE/Radio Shack Scanner Maker Belly up?

Newsgroup: rec.radio.amateur.equipment
Date: 2012-10-18 18:00:57 UTC

```
According to the rumor mill at radioreference.com GRE, the maker of Radio
Shack scanners, has stopped making scanners. There is nothing official
from GRE but they have fired most GRE US personnel and a ham radio seller
has posted an article stating that GRE has stopped making scanners.

If it is true then Uniden will have a monopoly on the scanner market and
prices will certainly rise.

The corporate site is still up, and I still see several GRE scanners
selling here:

http://www.universal-radio.com/catalog/scanners.html

Will Radio Shack confirm?

Posting-Frequency: posted twice monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

Hello.I'm new here and thought I'd throw this out there to see if anyone else has encountered this problem with the R71 radio.I recently took one of my R71s out of storage and the signal meter pegs to the right even when no antenn is hooked up.If I turn the preamp off it settles do about the middle of the scale.Someone told me it had to do with the voltage inverter going bad.This circuit is on the matrix board inside a metal can labled PS2.From what I understand a transistor gois bad inside this and has to be replaced.I opened the metal housing up and removed the small pcb inside.Supposedly the replacement transistor is a 2SD400.I went to the local electronics store(not-rip-me-off Shack) and they sold me a NTE382 transistor.Is this a proper replacement for it?I'm going to replace the electrolytic caps.in the circuit which may have caused the problem in the first placd.I'm going to recap the rest of the radio too once I get this straightened out.When I recap the radio,will this nessitate a realignment?Does anyone have a suggestion on where to send it for alignment?Thanks

Hi Ken
Quincy Rush here from Benson Az. Have a Sony CRF-150 that I am trying to disassemble. The string for the SW dial has broken. Wondering if you might shed some light on how to remove the case.

As a youth I spent 3 years in RAF South Ruislip and RAF Lakenheath. Jolly good time that was.

Cheers
Q

Come on, pay attention. The post you replied to is from 2008, almost exactly four years ago.

The chances of him still reading the newsgroup is close to nil. Most have migrated elsewhere, but even at the best of times any given newsgroup had only a relative few staying over the long term. And the post was a hit and run, he thought this was a buy and sell newsgroup (it's actually for the discussion of amateur radio equipment) and if he stuck around, it was only long enough to see if anyone replied.

If you really need to ask a question, don't go digging for some ancient message via google, start a thread and ask the question.

Google has a bug that allows replies to messages older than 30 days. In the past they'd had such a limit, it disappeared for a short time when they "upgraded" the interface (thinking in terms of their own groups rather than usenet) and then when they "upgraded" the interface a few months hack, they forget to put a time limit on replies.

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:

Blackhawks1-

I'm not familiar with that particular radio. I know that other similar receiver S-Meters will go upscale if the RF Gain Control is turned down. You might check to see if turning that control fully clockwise will correct the S-Meter problem.

Before replacing the transistor, I'd check the existing one with an Ohm meter. Many digital multimeters have a diode scale. The meter will measure conduction of a diode in one direction but not the other. A transistor acts like two diodes connected together at the Base. You would check the Base-Collector junction and the Base-Emitter junction to see if either is shorted or open in both directions.

223. Handheld for new Technician Class License holder

Newsgroup: rec.radio.amateur.equipment
Date: 2012-11-14 05:54:16 UTC
From: Justin <justin@nobecauseihatespam.edu>
Message-ID: <k7vbmb$k5s$1@dont-email.me>
Source record: 50

Hi folks. I just past the first basic HAM radio test. I was looking at getting a hand held radio that I can keep in my car or in my backpack for use in am emergency, like the 2003 Northeast Blackout.
The problem is, there must be a billion choices out there!
I'm not rich, and I'm not on food stamps either. I'm willing to spend a pretty decent amount for a product that's worth it.
I'm in the US.

I used the 2003 Blackout as an example, because I was lucky enough to be in NYC when that happened. I was stranded with somebody who had a hand held radio, he used a repeater and was able to have his friend (with power) on the other end call people and say they were OK. I thought that was pretty awesome.
I used to have a pair of Maxon GMRS-210's but I sold them on eBay many moons ago.

I think I would look at a Wouxun KG-UVD1P. This is a dual band Ht and can be bought for around $ 110 to $ 125 depending on where and what extras you get. Be sure to get the programming cable with it. While you can program them without the cable, it is worth the extra couple of bucks. Softwear for it is free.

I have one and several others in the club have them. Be sure to get one from a dealer in the US and not order from China off ebay. There is nothing wrong with this, except if you do get a bad one, it is just easier to deal with locally.

Here is an ebay number for one to look at.
261125157834

I know nothing about this dealer,but it seems he is in China where the radios are made.

There are a couple of others with a number of 2 or 3 in it that seem to be the same radio in a differant case.

There is another company that makes one about like it for around $ 50 called Baofeng. I do not know anything about that brand.

Ordering from China... I know stuff comes from there anyway, but the
last time I had a problem the Chinaman ignored me and there was nothing
I could do.
I'd rather order from a US distributor.

What about Kenwood?

Kenwood is fine. Here is a place in the US that has the ones I was talking
about.

http://www.wouxun.us/category.php?category_id=46

I am thinking the programming cable for the Kenwood and this one are the
same. I wouldn't doubt if many of the HTs are made in China.

I am waiting on one of the dealers over here to start inporting some of the
dual band mobile rigs that I am seeing on ebay that are in China now.

URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

A handheld transceiver should be the last thing you should buy, not the first.

A handheld transceiver is only good for a couple of things..

If you get a flat tire - you can stick it under the tire and use it to keep the car from rolling away.

If you need to kill a small animal for food, you can throw it at it.

The first thing you need to realize is that in order to be a effective communicator, you need to operate frequently - not just when there is an emergency.

It is not like talking on the telephone.
There is a certain lingo you need to learn and certain things you need to learn to do.

If you wait until there is an emergency - most times you will find that when you need it, you will usually find that the batteries are dead and the repeaters you thought that you would be able to hit - might not even work.

Buy yourself a mobile transceiver and mount it in your automobile and buy the best mobile antenna you can afford..
My choice is the Larsen NMO 2/70

Buy yourself a power supply and a good piece of coax - LMR 400 or Belden 9913 and a good antenna - Diamond X 510 would be my choice and use it often.

Technician class license is not a stopping point, but a starting point.
Keep studying and get yourself a General or better class license.

How about attending some of the meetings of the club that gave you your
ham (not "HAM," btw) test and talking to members about their HTs?

Check the website of that club, your local ARRL section, or the
main ARRL website (http://www.arrl.org/hamfests-and-conventions-calendar)
for upcoming hamfests where a variety of units might be for sale and
you can find out more about your options.

Unfortunately, the Ham Radio Outlet website doesn't have product
reviews, but I found this site that does:

http://www.eham.net/reviews/products/49

I hope you plan to use it more than just for a once-a-decade emergency!
If you get on the air frequently, you'll know what repeaters are available
in your area, whom you can talk to simplex if the repeaters go down, etc.

Good luck!

Patty N6BIS

I'd suggest that you make contact with your city/county ARES
organization, as they are likely to be the people most familiar with
"ham radio during local emergencies" issues.

They could probably provide you with some advice as to which HTs have
and have not worked out well for their members - reliable, easy to
use, easy to program, and having the features and bands needed for
communication in your area.

They can also probably help you with additional learning, about how to
communicate effectively during an emergency. There's a lot more to it
than "grab the radio, tune to a channel, hit PTT, and yell for help".

In my area (about 45 minutes south of SF), we teach a couple of
classes fairly regularly. One is an "OK, I passed the test and got my
license... *now* what do I do?" class for new hams - it's intended to
give first-level experience with HT programming, proper protocol and
etiquette when using simplex and repeater communications, that sort of
thing... how to get on the air effectively.

The next is a "fundamentals of emergency communications" training.
It's an initial training for people interested in organized emergency
communication support (ARES/RACES, Red Cross, etc.) and is useful for
anyone concerned about how to use ham radio (or similar, such as GMRS
and neighborhood FRS for CERT) in an emergency or disaster.

Your community (ARES or ham-club) may have something similar.

I have done a hub-page about JFET regenerative receivers:
http://litetec.hubpages.com/hub/JFET-Regenerative-Radio-Receiver
I have also posted a good amount of information on "The radio board" about regenerative receivers recently.
I hope that is useful information for someone.

Come on, pay attention.

You replied to a thread that started in 2003, then someone with a long retention time replied in 2006 and now you reply 6 years later.

Yet all you can say is an idiotic "yup"?

You can't even quote the message you are replying to so there is some context?

Once again, just because google has a bug that allows replies to messages older than 30 days is not a reason to reply. Except that idiots keep doing it, the rest of us would have no idea what you are talking about. But since it's an ongoing problem, every time I see a reply to a message I don't remember, it's clearly from google, and likely years old.

If you don't ahve anything significant to say, don't post. If you have something significan to say, then say it by posting a new message in a new thread.

Do digital receivers get discussed here much? I am working on a receiver for the WWVB signal at 60 kHz and am looking at a very low power all digital design in an FPGA. Of course some aspects are still analog such as the antenna. I have been reading about loop antennas for low frequency work. I don't plan on having an analog amplifier unless it is needed. I may be able to sample the RF signal directly and use processing to boost the signal out of the noise.

Has anyone done anything like this? Right now I am looking at how to synchronize the sample rate with the carrier so that I can accumulate the signal in a coherent manner.

Any pointers on where I could find more info?

Rick

237. Heil HC-4 & HC-5 elements in MINT D-104 Shell

Newsgroup: rec.radio.amateur.equipment

Message-ID: <K7HI.af369d8@radiobanter.com>
Source record: 164

UNUSUAL MINT D-104 MIC SHELL with TWO SWITCH-SELECTABLE HEIL HC-4 AND HC-5 MIC ELEMENTS. It is in Original Astatic box and comes with mating Astatic STAND ADAPTER (stand is NOT included) plus several feet of shielded audio cable. Stripped cable with NO mic connector. There is a mini toggle switch (at lower left area of mic head) that selects EITHER Heil HC-4 or HC-5 element.

These elements sold for $45. each (and up) before Bob Heil stopped selling them. If you own a Heil mic and even if you don't, you know that these things are as rare as hens teeth. You just can't find them any more. These are not the cheap knockoffs advertised on eBay. They are two genuine OEM Heil elements. What you see here is what you get - and it looks (and sounds) very good!!

$169. Including Shipping w/Delivery Confirmation
INSTANT PAYPAL REQUIRED

Original Astatic Crystal or Ceramic element is NOT included.
This D-104 Shell contains ONLY switch-selectable Heil Elements HC-4 AND HC-5, as noted.

Thanks,
Howard, K7HI

Hi, Rick,

Sorry, I can't help much, I am an analog guy, myself, and
pretty much of a rookie at that. BUT, I do have a couple of
inexpensive "weather stations" that I believe get their clock
synch signals from WWVB. I've never looked for or seen
schematics for their innards', but have to guess they have
some sort of receiver on an IC.
You've probably chased down this road already, but
just in case you haven't, what do you think?
They certainly don't have much of an antenna system
that befits a 60 khz (kcs, actually), and only seem to be
able to synch here in the dead of night when most of us
are sleeping, and most of the noisiest devices are either
off or at least on standby.

Hi Chief,

Yes, there is at least one company that makes these chips. They are a conventional superhet receiver designed to work with a tuned ferrite antenna. The one I have seen even has several outputs to allow selection of tuning capacitors so the chip can receive a number of different signals other than just the WWVB timecode.

This is a nice device, but I am attempting to show the low power potential of an FPGA and the power of digital signal processing in this application. I am hoping to show that I can pull the signal out of the noise better than a conventional receiver while using less power.

My understanding of the signal processing is actually my strong suit for this project. I have been reading up on antenna design for LF signals and I think a tuned loop antenna will give me a stronger signal than the tuned ferrite coil. The ferrite coil has to be used with a front end amplifier which I hope to omit. We'll see!

I have a simulation of the ADC working well and will be adding the DCO to synchronize the sample rate to the carrier. I should have an eval board next week (gratis of Lattice Semi, they're great folks!) and will be working on the antenna.

The antenna design is my weak area and I will be learning a lot there.

Rick

That's a misdirection. Most of those "atomic clocks" will only try to sync up early in the morning, it's not like they are trying all day long. Once a day is good enough, the time can't go astray in one day, and it makes sense if they are doing it only once a day to do it in those early hours when a lot less junk is out there.

Most can be told to resync by the press of a button, I find it varies whether they can get a signal during the daytime or not, though it's not something I try much since virtually every night they do sync up.

My Casio Waveceptor watch is different. Not only will it work with stations other than WWVB (well if you're in England or Europe, or Japan), but it checks for an update at midnight local time. If it gets the signal, it stops checking for the day, if it doesn't then it keeps checking every hour till I don't know when. I've had it two years and every so often it misses a sync, but except for early on when I didn't orient it properly, I think the only times it hasn't sync'd up was when I still had it on my wrist until way too late, or I did't put it back in the right place. If it misses at midnight, it generally gets it by 3am at the latest.

And it has a much smaller antenna than the wall clocks. The wall clocks must have larger antennas (I've looked inside one) but they require proper orientation to get the WWVB signal here.

it is interesting that any WWVB receiver in the ham or hobby magazines over the years have used a large loop.

Are you sure they are superhets? When those clocks have come up before,
people have talked about 60KHz crystals as filters, and down there you
wouldn't need to shift to another frequency for selectivity, while you
really would want to keep out junk before there is much amplification.

Every construction article about WWVB receivers I've seen over the decades
starts with a large loop and then amplifies the signal at 60KHz. The
design needs is different from a general VLF receiver since you only need
the one frequency. Amplifying at that frequency isn't difficult, keeping
junk out would be.

Very interesting, Michael. I hadn't thought of my WX machines checking
at a predetermined schedule. That helps explain (to thickheaded me) why

they won't sync when I go thorough the messy set-up algorithm after changing batteries, but have usually sync'd by the time the cock crows.
I notice Rick has slid over to the slightly more appropriate rec.radio.homebrew slot with his interesting quest.
How many years have I been reading your contributions here, Michael?

No, I'm not sure they are superhets, I don't recall the block diagram at
the moment. I suppose you are right that they just need to filter out
the junk (done mostly by the antenna) and get a signal that is above the
noise to measure the amplitude.

I could use an amplifier, but I'm trying to minimize the power
consumption and I think I can do it without the amp through averaging.

247. Working on HP5255A freq converter?

Newsgroup: rec.radio.amateur.equipment
Date: 2012-11-24 20:58:09 UTC
From: Scott <acepilotREMOVE@bloomer.net>
Message-ID: <Q5KdnVeFxvp8qSzNnZ2dnUVZ_qCdnZ2d@bright.net>
Source record: 174

I have an old HP 5245L freq counter with plug in 5255A converter module that I bought long ago and never got around to testing. The converter module is not working, but the freq counter itself is working with the main input, but works a bit using the aux in port, so it sounds like it could be a bad input attenuator, mixer or maybe the 200 MHz oscillator stuff is not working. I have a copy of the manual and it talks about working on the cards with extender card while the unit is installed in the counter. Problem is, there's a metal "casting" all around that the converter slides into. How does one remove the top cover of the module and insert extender cards with the case compartment in the way?

Sure would be nice to have freq counting capability up to 12 GHz!

248. Re: Handheld for new Technician Class License holder

Newsgroup: rec.radio.amateur.equipment
Date: 2012-11-29 23:34:03 UTC
From: Channel Jumper <Channel.Jumper.afdf5d8@radiobanter.com>
Message-ID: <Channel.Jumper.afdf5d8@radiobanter.com>
Source record: 175

To introduce myself - I have been involved in communications since 1970 and I have been a volunteer examiner for 1.5 years.

At the very basic level - we have been giving one test session per a month for the last 18 months.

Most every test session with the exception of Ham In A Day classes - the only participants are the people that I enticed to come along and take the exam.

I even went so far as to have the first VE test session in my county in 25 years!

Two people showed up and one person passed the exam...

I thought about what I could do to make ham radio more user friendly.
I came to the conclusion that I could round up as many ham radio magazines as I could find.
I contacted the local vendors of ham radio equipment - HRO and AES and I got them to send me a case of catalog's.
I then circled the best transceivers, antenna's, coax, power supplies, SWR meters etc and I handed them out.
I also gave the surplus catalogs away to the other VE's so they could give them out at future events.

The Key to Amateur Radio is to have a Elmer!
You say - what is a Elmer?
A Elmer is a experienced HAM - a person who operates every day and is willing to open their shack to anyone that wishes to use their equipment to get on the air.
A ELMER is a person that is willing to LEND you equipment - short term, so you can get on the air and make some contacts!

Note I said short term!
Some people - once they get something that works - even just a little, will stop - because they dont want to spend their own money!
Those people are not HAMS!

As a example - the one person who passed the test at my VE test session, had a transceiver that was given to him when he worked for the Forrest Fire Service in Colorado.
He felt that since he had a mobile radio and antenna - he didn't need anything else, because it was programmable into the 2 meters / 70 CM bands.

Only when he took the test - it was 65* outside, and when he got his license it was only 55*.

Now it is only 35* and operating outside is out of the question...

So he got one of his forest fire friends to send him a power supply, FREE - all he had to do is pay the $18.00 shipping..
He actually complained because he had to pay $18.00 for a 20 amp power supply..
At that point, I washed my hands of the guy - because he won't ever make it in my world...

Yes you can make a couple of contacts with a cheap - $50.00 walkie talkie, but NO - it is not a reliable form of communications...

The only exception to the rule is a old Radio Shack HTX 202 that I bought at my ELMERS SK auction.. It was broke, no manual, the battery was dead.
No one wanted it when it did not work!
I bought a battery pack and I made a mobile power cord and I was given a mobile handheld MFJ magmount antenna to use.
For 6 watts - it does remarkably well in certain conditions.

I have been able to hit repeaters 40 miles away - that are in a good place, as long as I am in a good place.. No one is going to drive 12 miles to the top of my mountain to operate on 2 meters...
So yes it can work - as long as you are in a good situation..

The problem is - I live in the mountains and If I drive down the road 1/4 of 1 mile, the signals all drops out and I have spotty coverage while mobile.

The other problem is - most people I know that are old hams - do not know how to program their own radios.
The exception is the ones with the Alinco's and ADI's because they were so simplistic - all you had to do was program it from the VFO and add the PL and Split and there you have it.

Try to do the same thing with my Kenwood TS 590S on 10 or 6 meters and you will see the difference immediately..
Those same people - who usually doesn't even know how to operate simplex - unless someone programmed it in for them, are perplexed when you ask them to show you how to program your transceiver and they usually make excuses why they are too busy to do it.

Some transceivers like my Yaesu FT 8900R - its so difficult, you are better off just using the programming cable and a aftermarket program...

Maybe this will explain a little of why I am so against handhelds for primary communications..

Posting-Frequency: posted twice monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.

253. CB radio for emergencies?

Newsgroup: rec.radio.amateur.equipment
Date: 2012-12-07 21:48:11 UTC
From: Justin <no@becauseireallyhatespam.edu>
Message-ID: <k9to7r$de2$1@dont-email.me>
Source record: 180

I was thinking of getting a pair of handheld CBs for emergencies. I'm in the US just FYI since each country has a billion different standards. I saw a story about Hurricane Sandy, where a family member went out to help somebody down the road. Wouldn't it be nice if he brought a radio so he could communicate with the people he left at home? Since I my area was amazingly lucky and had literally zero damage even though the storm passed right over us. Things could have been very different. It got me thinking that if I were in that situation.

I was thinking of a set of UHF, GMRS, or even business band radios. I knew I would be breaking the law using them, but during an emergency I don't think anybody would come after me. I would not use them every day. I'm thinking CB might be a good idea too, since there are probably more people on it and they could listen in and possibly help. A good thing if emergency services are stretched if operating at all.

Eventually I plan on getting a HAM license, and being part of the local Amateur Radio Emergency Service (ARES).

What is your input? Any specific models or brands of radio I should get that fits the bill?

As you are planning on getting a ham license, you may want to look at this
brand. Go to Amazon.com and search for Baofeng. They are small handy
talkies that have an output of about 4 watts. They can be programmed for
the ham bands and other frequencies. Be sure to get the programming cable
and softwear for them. A pair should be less than $ 100.

Yes I'm planning on getting a HAM license, however I'm studying for the
CPA first.
What about brands like Kenwood? Aren't they know for decent quality?

They are fine brands. Just as Icom and Yeasu are. I was thinking of the
price. You get about the same in any of them. I have a Wouxun HT that I
bought several years ago. Many in the ham club have them and they work
fine. That is about a $ 120 each radio.
There are many places to get the Wouxun. Here is one :
http://www.wouxun.us/item.php?item_id=216&category_id=46

I bought mine from a local dealer.

Justin-

If you do get the pair of handheld CB radios, they should be a relatively inexpensive "learning experience". They may be of some use, but you will learn they do not work over a very long distance. Their range is mostly limited by interference from the many other users of the Citizens Band, even if the radio at home is connected to an outdoor antenna.

Using GMRS radios may not have as much interference, but are limited to line-of-sight distances. If there is a nearby GMRS repeater with a high antenna, your range would be determined by the line-of-sight between each radio and the repeater, which could be several miles. If there are no repeaters in your area, you would need to install one of your own, perhaps on top of a tall building in your community.

The same is true with Ham Radio. Using a Two Meter repeater, your hand held radios might have a range of several miles. There are Ham Clubs that sponsor repeaters in most population centers, and many are involved in ARES and RACES emergency services. I suggest you look for Ham Clubs in your area. Some offer free Ham Radio License Classes to get you started. Take a look at the ARRL website, <http://www.arrl.org>.

Just remember, in a true emergency, power failure may keep all of your radio systems from working unless they have backup power. In many situations, the Cellular Telephone System may be the only working system in the early hours.

>
> that fits the bill?

ARES - Amateur Radio Emergency Services - requires you to join ARES, to participate in at least 75% of their nets and activities..
Their nets takes place on 80 meters - 3.800 - 3.999 MHz - which requires you to have a General Class or higher license.

Both the Technician and the General requires you to pass a 35 question, multiple guess test.
Each time you upgrade - you will be requires to learn more.

The problem is - then you need a transceiver that can do 80 meters, a 80 meter antenna, feed line, a power supply, a tuner - since most antenna's are not resonant on 80 meters except for a 80 meters dipole - very large antenna, or a Barker & Williamson BWD 90 which is about the same size as a G5RV - fits in a space about 100 feet long and needs to be 60 or more feet in the air.

That is out of reach of most city dwellers and people who lives within a covenant - housing development plan.

Although amateur radio now has more licensed operators then any other time.
Historically - it is loosing its core members at a proportional rate, and the old members would need to mentor the new members to make them contributing members of society.

The problem is - most of the newer members comes from the CB radio and we can't teach them nothing because their mouths are open and their minds are shut.

CB radio mentality is if you cannot make contact - use more power.

They don't understand how antenna's radiate the power applied and they don't understand how communications works.
ALL THEY WANT TO DO IS TALK!

I would suggest that you find a real amateur radio club and join it.

Get some advice from some real hams - if you can find them.

Do as much internet research as possible - learn as much as you can learn.

The CB radios would be for short range, maybe half a mile, or around the neighborhood. When Sandy hit the cell phones were out for days. Even though my area was relatively unscathed, the towers were still down. Just having the ability to talk to a family member back at the house would be nice.

I don't know of any GMRS repeaters in the area, but that's a good idea, I'll check it out.
Is there a website with all of them mapped out?

That's true, the cell phones worked for a while but not for long.

What about those TriSquare radios? I know TriSquare is toast, but was
the technology any good?

Just as well, there aren't any repeaters around here. Closest one is 40 miles.

The technology used in the TriSquare is the same as found in the iDen/ISM Nextel Cellphones when used in direcTalk Mode... They used the same Motorola chipset. These Phones are available on eBay for DIRT CHEAP ($10US or less each) They are Part15 Devices and ARE SECURE Comms with about the same range as FRS Radios. They are 902-928 Mhz Spread Spectrum Radios... and if you are a Tech Class or Higher Ham, you can boost Output Power up to 10 Watts, and patch in any External Antennas you like. A full writeup can be found at:

I would contact the ARRL before I would make a investment like that..
There is a pretty good chance that what you are talking about is not
legal.
I don't know if those phones are Part 97 approved and I am not sure if
spread spectrum or digital phone is legal - because of the way it might
be scrambled being a phone and all.
Second problem is that in order for any type of communications to work -
you need to have two radios on the same frequency and I highly doubt
that in a emergency you are going to find people operating on 900 mHz..

As a matter of fact, unless you are in a big metropolitan area - you
probably won't even hear anyone operating on 220 MHz anymore..

Most Technician's are relegated to two meters phone - due to the fact
that most walkie talkies are two meters and the cheapest mobile radios
are two meters only..

Even just getting someone to buy a dual band transceiver or better equipment is like pulling teeth...

Like I tell all perspective hams - get a license and join a real ham radio club and LEARN... Find a Elmer - don't think that you can do it on your own..

Posting-Frequency: posted twice monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to

> on your own..

Your an Idiot.... There is NO Part 97 Approval required for
Transmitters, only for Amplifiers that are built "For Sale"...
I mean, REALLY... Duh.....

These units are Part 15 Devices when used in the 902-928 Mhz ISM Band,
which is co-Located with the 902-928 Ham Band, which is a Secondary Use
Ham band.... So any use of the device, by a HAM of Tech Class or Higher,
may ADD External Antennas and Amplifiers, as long as they do NOT exceed
the Power Limit of 10 Watts, which was added to Part 97 this last spring,
in a Report and Order from the FCC, which changed the Allowed Power
Output for Spread Spectrum Frequency Hopping Systems in the 902-928 Mhz
Ham Band to 10 Watts.... Duh....

Your Scrambling Theory, is also BOGUS, in that it is NOT Scrambling but
Digital Modulation, which by it's nature is unrecoverable without
knowing the Spreading Code, and Spectrum Chunk, USED..... DUH...

You just don't get it, do you.... These type Units are for SECURE Comms
within a Group... Not for communicating with unknown Users.... They
allow the Group, to communicate within their Group, knowing that their
Comms ARE SECURE from Scanners, and DF'ing non-Group outsiders. They
ALSO allow individuals in any Group, to move to Private SECURE Unit to
Unit Mode, that allows only those two Units to have a SECURE Comms
interchange, that can't be heard by any other of the Groups Users, by
using the Programmable Ten Digit Unit Number of the other Unit for the
Spreading Code, instead of using one of the 1-15 preProgrammed Spreading
Codes, which are used in Squad Comms Mode.....

Must be nice to comment on Technology that you have NO CLUE, about...
Kind of like a Talking Head on the Boobtube.... Are you Blond?

Justin-

CB walkie-talkies might be capable of that if no one else was there.
Considering that you can sometimes hear other people hundreds of miles
away, half a mile might be optimistic!

Go ahead and get a pair. You probably have time before the next storm,
to see how well they would work for you.

For local information about GMRS repeaters, look for a store that
repairs the radios. They can probably fill you in on repeater
availability, and will also sell you the radios.

I have an old Radio Shack? Science Fair Radio kit model 28-222 - without instructions..

I need to know where to connect the entenna coil wires, the speaker/headphone jack, and the battery. I have found points with W, R, and G that look like the place to connect the red, green, and white coil wires, but cannot figure out where the black goes. The speaker connections and battery connections are a complete mystery

Anyone have the instructions floating around or one you could send pictures of? It's been sitting here uncompleted for a LONG time.

270. Re: science fair radio kit 28-222 help needed.

Clare-

I found a discussion about your radio kit at
<http://www.antiqueradios.com/forums/viewtopic.php?f=4&t=188702nk>. It
includes links for data that has apparently been removed due to
copyright problems.

If you can make contact with participants in that discussion, they may
be able to answer your questions.

Another discussion at
<http://www.antiqueradios.com/forums/viewtopic.php?f=4&t=196521>
suggested that the Radio Shack version was very similar to a Graymark
536 AM Radio kit. Perhaps someone in that discussion can answer your
questions.

Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted twice monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.
